

LACQUERIZE CARE ADVICE V FOR HAIR & BEAUTY MERIVALE

Phone 3556584 www.vforhair.co.nz www.facebook.com/vforhair

We know you will absolutely LOVE your nails while you are wearing LACQUERIZE and we expect your nails to last flawlessly for at least 14 days as long as you give them a little care and attention during that time.

LACQUERIZE is pretty indestructible with normal wear and tear, but you will need to add a little protection to your nails if doing tough jobs like household cleaning and gardening, hobbies that are rough on your hands or using harsh chemical products without wearing gloves; doing these things without protection can mar your LACQUERIZE service.

If you do happen to cause some damage to the LACQUERIZE coating and see any of the following signs, I hope you find the advice below helpful.

- ALWAYS wear gloves when doing household chores etc gardening, cleaning etc.
- If lifting or peeling is noticed please do NOT pick or pull at the lifted area, as this will cause the lifting to increase and could even damage the natural nail, if you are not happy with your treatment then get back in touch with us asap on 03 3556583 so that we can assess the nail and decide if a repair is necessary. Please note that repairs will be chargeable.

Instances where LACQUERIZE may not achieve the desired result are when you have just had gel or acrylic nails removed or if you naturally have an oily nail bed. Our therapist will be able to consult with you on these matters.

- If you are on holiday please be careful when using sun tan oils or insect repellent solutions as many of these products contain DEET which will cause major damage to the LACQUERIZE colour coat, as with any gel products, enhancements or even normal nail polish. Chlorine can also affect LACQUERIZE so please ensure feet and hands are dry after swimming and before sunbathing.

If you wish to temporarily change the colour of your nails whilst wearing LACQUERIZE you can use nail enamel over the LACQUERIZE but please be sure to use an **Acetone Free Remover** when removing nail polish.

Relative to your life-style and activity level, your LACQUERIZE will need fortnightly or three weekly maintenance as there will be obvious re-growth. At this point I can either re-LACQUERIZE your nails (remove existing LACQUERIZE and applying a fresh new colour) or remove the LACQUERIZE completely which takes a brief 10 minutes. If you do decide you want to remove your LACQUERIZE please call us and let us do it safely for you. Incorrect removal at home may damage the surface of your nails. We will be able to remove LACQUERIZE using a professional remover and to give you a mini-manicure so that your natural nails look perfect.

MOST OF ALL ...ENJOY ʘ
